

**ENERGY REPORT October 2022 -
THE COMPLETE SET FREE OF THE HUMANITY**

Anna Architektura, Architektura Osobowości

Translation: Magdalena

In some passages of the text I do not write directly for obvious reasons. To illustrate some phenomena better, I use the description of dual reality and the Earth calculation of time, although everything is happening non-dually in the now, anyway. I present some processes in the simplest possible way, so that they are understandable. Those who need to understand the text, will understand without any difficulties. The text is meant to be read with the Heart.

(1)

To begin with, a **short summary of September**.

As of so far, September was the most intense month in terms of descending energy and the significance of occurred processes. The most important process was the beginning of the actual collapse of a dual reality.

Firstly, on **6 September there was a strong** (although not the first) **solar flash** that initiated, seems, the first in the history of Schuman Resonance readings a complete, so long, break in emission (approx. 9 days). In result, between 6-11 September very strong energies of the Unconditional Love reached the Earth uplifting a collective level of vibration. On results of this event, I will write in the next parts of the report.

As a consequence, the first central event on 8 September (England) took place, that will initiate the complete change of the course of the events globally. I prognosed that event in September. I said that *'there are exact entries on central events in the near future (...), however, it is unknown when exactly they happen taking into account earthy time line'*.

Let me remind you, that a central event affects the whole population and for everyone takes place at the same time. This is a central nexus from which – radially in all directions – branch off secondary events, that affect subsequent places and people. It reminds a circular net with a central nexus in the middle.

A lot has been written on events in England. I add, that this is the beginning of the collapse of the three main pillars of humanity enslavement: the financial system (London), the knowledge (Vatican), and the economic system (Washington). What is visible in the energetic space the 'change of guards' in England looks like a short one (3,5 years, up to 2026). It will though cause a global relaxation of the politics and financials. What will it bring in a matter – the reality will show.

From a global perspective, the event on 8 September caused a massive change in energies. Sensitive people could feel a very strong tension during days just before the central event (6 and 7 September). **On the other hand, on 9 September, in the energetic field we could feel a massive lightness and a significant increase of a vibration level.** This happens always when the overall energetic balance changes to higher whilst a strong, low vibrational energy goes away.

This event commenced a physical decay of a dual world (*the actual mechanism of same from the energy perspective I described in details in September 2022 report*).

In a summary: the decay of a dual world (reality ego-mind) commences by the full separation from each other of opposite timelines, an increase of vibration on ascending line and its transition from a dual to a non-dual heart vibration. Ipso facto, a closure of the energetic supply for a descending line and its collapse under its own weight (it reminds vanishing of a black hole by a sucking into own inside). The collapse of a dual world is strongly connected with processes that I will describe in this report.

The further strong inflow of energy commenced in the evening of 16 September and lasted till 24 September. In addition, on **19 September auras from the central Sun reached the Earth that brought the highest – as so far – level of descending energies.**

Some people – already ready to receive with their bodies so high frequencies – could feel an immense lightness, a big energetic boost and a mood uplift.

People that are still in the process of their programmes release could feel intense emotional reactions or felt tired, asleep. They also experienced a manifestation of life events that ask for attention and let go and that has not been so far noticed.

The identification of reaction to flowing in light waves could be a very good barometer, how much our body is ready to absorb and pass large energetic doses.

At the same time, exactly at night of **21 to 22 September a very strong process of cleansing the collective memory took place.** In addition, **from all timelines the let go of reminding patterns and energetic recordings connected with other timelines took place.** The arrangement of each timeline is necessary so the process of the increase could run further without any disruption on each line, according to their events scenario. **Meaning that an access to mixing and connecting time lines has been fully closed.**

To remind (I described various timelines in details in a June 2022 report): overall we talk about two timelines (ascending and descending). Moreover, an ascending line – depending on the amount of completed DNA strands of a particular being – split up to three paths: (1) transition and further evolution on Tara, (2) transition and further evolution on Gaya or (3) a direct ascension to a field of a pure consciousness.

Between 22-24 September approximately 10% of beings with completed 12 DNA strands connected all of their helices into one. Meaning they completed fully a crystallisation of their physical bodies. This group is physically ready to transfer to a higher dimension. By the end of the year this group will be joined by a reminder of beings with completed 12 DNA strands.

On a physical level it could be felt (especially at night 21/22 September) as a very strongly penetrating to the bone marrow cold that lasted in some cases even few hours. After the cold a strong wave of heat commenced. And for 1-2 days a flu symptom may have appeared.

The whole time **in a collective field there is an intense process of clearing all what is low vibrating.** Effects of same will be visible more in October and subsequent months as a lack of effectiveness in actions of low vibrating side, further passing away of beings and revelation of information.

(2)

October will bring a continuation of human bodies transformation process (I wrote about it more also in May and June 2022). The transformation will embrace especially endocrine glands (that may result in the functioning: changes/disruption in a sleep rhythm and wakefulness, changes in a physical activity, changes in eating habits – quality/amount) and human brain (a big clarity of thinking, easiness in linking information, speeding in finding solutions). Changes in the energetic systems of people are to allow them to reach higher and higher levels of personal powers (so to absorb higher and higher amounts of energy through their bodies).

Energetic symptoms of these processes can be felt in the bodies as tingling in the back and arms. On the chakras level, in the heart chakra (rhythm disturbances, palpitations) and the throat chakra (hoarseness, scratching, cough). It is important to be cautious to one's needs, especially with regards to a diurnal rhythm and a need for a rest.

(3)

In October commences for good the most important global process, that will definitely split time lines (its finish can be seen in the energetic field on Spring 2023). It concerns a fully completed mutation of a solar plexus (from undulating in nature to a fixed one). I add that on an individual level some people commencing 22 September can experience a foretaste of that change.

About solar plexus mutation that is responsible for a human evolution transition I mentioned already in July and August 2019 reports (see 'Humanity on a turn. A change in 2027 parts 1-3' and in the energy report from March 2022). This mutation concerns only an ascending time line.

In a nutshell. **A solar plexus that had an undulating nature has so far been responsible for emotions. It was energized by a base chakra (fear, aggression) or a sacral chakra (desire, a need of possession).** Those two lower based chakras are connected with directing our attention to an external. So low vibrating emotions are triggered by the external factors. A human being has no influence on external factors as such (although many claim the opposite), these emotions were not predictable in its intensity, could appear and disappear unexpectedly, last for unknown time period. They oscillated between extreme states. They looked like a sinusoid. And even though some people by nature are not emotional, when encountered a collective emotional field these beings also could experience suddenly irritation, lack of patience, anger, excitement, sadness etc. (People that I have done for the energy-psychological reports know that it concerns those who have undefined solar plexus).

We could say that emotional triggers could be all external situations where a human being 'depended' on an external factor. These could be for example interpersonal relations or other daily situations. On the pattern level it was connected with expectations (something must be this) and disappointment (something it not this). The key element played ego-mind.

In October we can expect the biggest – so far – and the most to be felt **change connected with a mutation** in the area of a collective solar plexus. **A solar plexus – on a collective level will start having a fixed nature.** It is possible because enough beings have completed their own transformation at same.

A solar plexus will stop being powered up by low vibrating energies from lower based chakras and will direct towards a heart. It will commence generate feelings. Feelings are not undulating in nature as emotions (emotions come and disappear triggered by an external factor). Feelings are not unpredictable and changeable in nature. Feelings are stable and continuous in nature. They are connected with a particular inner state of a human being. Feelings are not conditional from external factors. A human being connected continuously with their heart constantly experience feelings. An example of a feeling (versus emotion) could be love (not be mixed with a desire), happiness (not an excitement) or peace (not to be missed with an apathy).

A solar plexus connects with a heart to create an immense will centre and a true creation of the reality. On the individual level it brings a total inner peace and a lack of any felt disturbances in an energetic field of a particular person.

Human being on the ascending timeline that have not completed yet all their DNA strands, their stabilisation of the feelings can last for the next few months and will be preceded by extreme states (extreme dual spectrum). It concerns one's own behaviours, external situations and a state of mind. These beings can show a big lability in the coming months and can still be prone to noises coming from low vibrating beings. This is why it is so important not to give them an access to our own energy field. What could be helpful is keeping one's emotions in control, thoughts discipline and conscious directing of our attention to one's inside or to external high vibrating fields.

(4)

That solar plexus mutation will bring for the ascending line in October (and consecutive months) a complete humanity freedom (firstly beings with a completed DNA strands) from the influence of low vibrating beings. From a vibrational point of view these two groups will stop having mutually influencing fields. We could say that the humanity 'have done their homework' and moved to the next level of consciousness (fourth chakra and collaborating with it a third chakra), to which low vibrating beings have no access, because their field of actions are solely vibrations from first and second chakra.

This is the end of problems with energetic parasites, blocked chakras, energetic attacks and knocking out a soul form a body, what I wrote about in the last few reports. I add that summer months and the beginning of September this year were the most (comparing to the last 2-3 years) intense in energetic attacks on humans. They have been turned on systematically few times a day recently.

A glimmer of freedom was on 22 September. October will further anchor that change.

The partial exit of humanity from a duality is changing completely the balance in energies and will cause a partial collapse of a low vibrating side. (Regarding technical aspects of the dual reality decay process I wrote in September 2022 report). It links with a central event on 8 September in England. At the moment it reminds falling apart dominoes cubes. It will be a fast process (next months). And will be connected with emerging completely new solutions (mainly 2023 year).

(5)

Due to freedom of ascending line from low vibrating beings, people with completed 12 DNA strands, will feel lightly, at peace, with additional vital forces, that will no longer be blocked or noised by low vibrating influences. In consequence, it will bring the humanity even faster changes in the matter.

Regarding hybrid beings (that are the majority in the society) that are on the ascending timeline, can appear a temporary state of dissolution and then a big anxiety, tension. Because they will start understanding what they have been participating in and what have been happening so far. This is the beginning of their own revelation. In the energetic field we will get access to more and more information on who is who, also in the spiritual area. It can cause an initial chaos, until the full acceptance of what is occurs and reorganisation of resources into constructive ways of acting. The apogee of this will be in the coming next three months (November-January).

For beings that chose the descending timeline the real chaos commences. Here, energetic resources will run out very quickly, because the so far sources of power up will stop being accessible. Within this group it means a dramatic fight for an energy and a collapsing of their space under its own weight. In this group we will observe the most passing aways and overall destruction.

My thought (especially for the hybrid beings on the ascending line) is to stop sourcing with their own energy and attention the scenario for the descending line. It is also worth to take care for one's vital energy reserve for the coming months. It will be useful in the individual change processes.

(6)

On the global level October commences also a disassembly and release of the three main pillars of the humanity existence: politics-financial system (England), knowledge (Vatican) and economy (Washington). These changes started already with September events in England. In the next coming months this process will continue. Although, a lot of these event will happen not officially. We will see the results of this process in 2023 and consecutive years.

These big and radical changes Spring next year will on the other hand bring quickly new, good solutions. And despite that a low vibrating side will try to stop this process, their resonance on same will weaken from a week to a week. Any 'sensational', 'media events' and other attractors will be too weak to keep that colossus on its clay legs alive. Indeed, interesting times ahead of us.

(7)

The solar plexus mutation will anchor in some population a fixed state of being in NOW (concerns beings with a completed 12 DNA strands).

A lot of beings think that a state of being in NOW is with regards to time. That this is a moment between the past and the future. This is a false concept of ego-mind from an old dual matrix linked with illusory reality perception through a concept of time. The time as such does not exist. True however, it serves the mind for facts ordering. In the meantime, **a state of being in NOW does not concern time. The mind in NOW concerns places and situations** (heart perception and non-dual reality).

A mind in NOW is a full acceptance – though a heart chakra – of what has been just happening. Without linking to the past or expectations towards the future. **This is allowing for a free flow of life the way it is.** It does not mean passivity. It means an exact – according to one's own energetic strategy (see a psychological-energetic profile) - reaction to happening in NOW circumstances from an Unconditional Love level.

Personally, I wish all Readers high vibrations and a state of being in NOW.

With love, Anna Architektura.

I also encourage you to read the earlier series of energy reports available at <https://architekturaosobowosci.wordpress.com/>. They not only carry information, but most of all, they anchor new energies in people and allow you to maintain a higher vibrational level.
