Dears,

We have just experienced a year of the biggest human consciousness awakening on all levels that will commence redefinition of human values and the biggest changes in human history.

As I wrote New Year's 2022 wishes last year, 2022 brought key events in May and June (*at the time I wrote that it would take place in the middle of 2022*). It was connected with a creation of three separate time lines (two ascending and one descending) that the humanity started following. The timelines determined completely different then so far course of events for the humanity. It started a successive collapse of an old system and the healing of planet Earth on all levels.

When it comes to **2023, the best words to describe it is 'a year of values redefinition'** as an effect of a massive increase of human consciousness in 2022. It will bring immense changes on all levels of a social life, economics and politics. For many it will also be a year of the biggest, personal transformation. It is a year of an action, cooperation and creation based on new values, according to a Heart vibration.

It is a year when people finally in real will take matters into their own hands instead of waiting for changes and agreeing to what does not serve them. **An implementation of own personal decisions according to new values will commence already in Spring. In the middle of the year, we will finally see a so long-awaited collective cooperation** so to create new systemic and social solutions on a big scale. All based on goals to serve humanity.

It is a year when people – after realising own power of creation and flowing from same freedom, but also a personal responsibility – will finally take an action. Without a fear. People will also start set boundaries to falsehood and current absurd on many levels of a social life. In effect, it will lead to a complete system collapse. Time of an active action – as a response to events that commenced in 2019 – these are leading themes for the whole New Year 2023.

As such, I wish Us All, that 2023 fulfils each human being with an optimal Personal Power of Creation, according to the Highest Good for the Common benefit. Let it be a Year of a Freedom, a personal Abundance and an Unconditional Growth. It has become already on all levels of Existence.

With love, Anna Architektura
